

Drama Llama

Kae Job Sluder
(they/them)

Big Picture

Create tools for healthier internet use.

Use the same machine learning (ML) models and strategies used for targeting users to empower users through personalized analysis, filtering, and tagging.

Project Goals

1. RSS fetching and viewing
 2. Keyword or regex tagging
 3. Natural Language Processing (NLP) tags
 4. Desktop app or desktop browser app
-

Live Demo

Original Plan

- Electron/React Framework
- Typescript/Typescript
- NoSQL Storage
- Nautral.js NLP library

Current Demo

- Flask/React
 - Python/Javascript
 - Material UI for React
 - SQLite with JSON (NoSQL) features
 - (Future) python language crunching tools like spaCy and NLTK
-

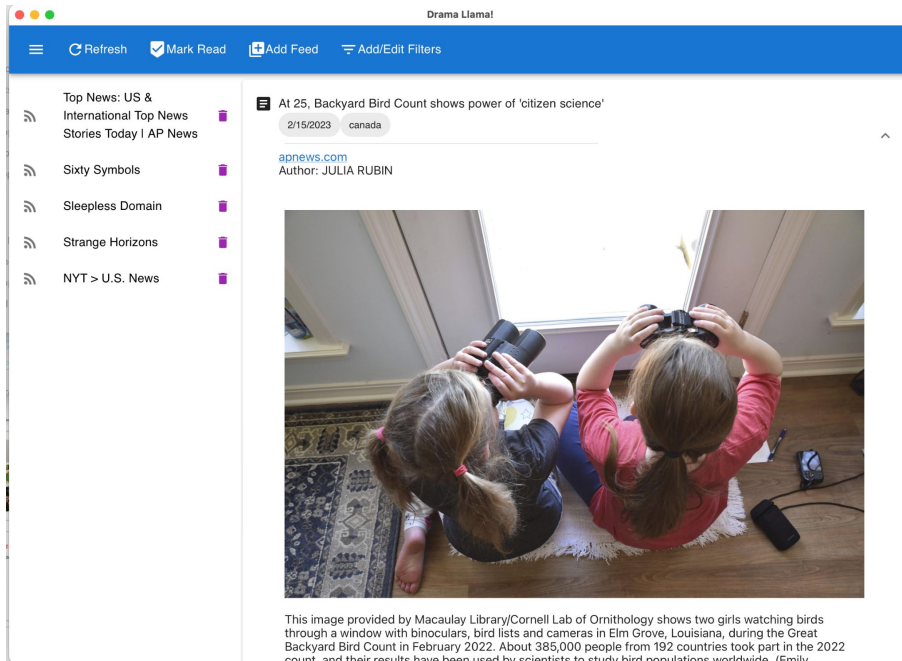

Now, up to now my plan went all right
Until we tried to put it all together one night
And that's when we noticed that something
was definitely wrong

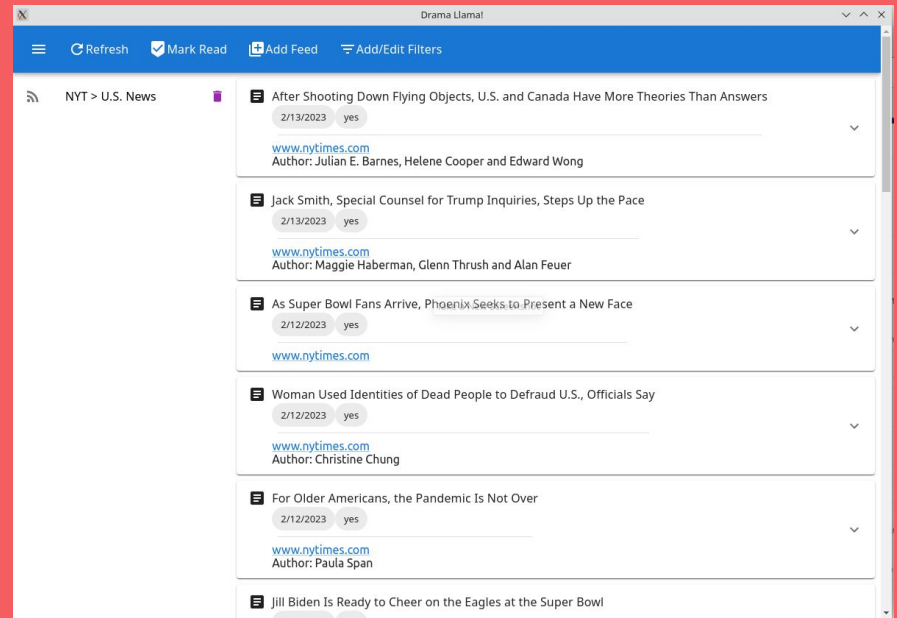

The transmission was a '53
And the motor turned out to be a '73
And when we tried to put in the bolts all the
holes were gone

– Johnny Cash, “One Piece at a Time”

MacOS

Linux

Key Lessons

- Debug the whole process, including build tools, testing, and deployment.
- Change a few things at a time.
- Added user interfaces can be big time sinks.
- Make space for self-care, especially when other disasters happen.
